Product Description

Data contained in this report represents an aggregate of the Combined Nomenclature codes shown in the left column of the following table. In order to provide an overview of the aggregation criteria used, categories similar to that of the products included in the Ulisse Product Code are shown in the "Description" column. The "Weight %" column indicates the percentage weight of each code of the Combined Nomenclature used in the aggregation. **This weight is determined by using the European Union structure of imports .**

CHAPTER 84 - NUCLEAR REACTORS, BOILERS, MACHINERY AND MECHANICAL APPLIANCES; PARTS THEREOF

CATEGORIES: Dishwashing machines; machinery for cleaning or drying bottles or other containers; machinery for filling, closing, sealing or labelling bottles, cans, boxes, bags or other containers; machinery for capsuling bottles, jars, tubes and similar containers; other packing or wrapping machinery (including heat-shrink wrapping machinery); machinery for aerating beverages

Code	Weight %	Description

Database

Information contained in this document is derived from the **Ulisse Database**, that was developed from the UN (Comtrade), Eurostat (comext) and US Census Bureau (db UsaTrade) databases. You can browse the data through the **[Analytics Section of Exportplanning.com](#)**. The Ulisse Database basic unit is the **Annual Flow of World Trade** for a given product code between two partner countries.

Its identifying element are:

- **Product code** of flow
- **Origin country** of flow (150 countries)
- **Destination country** of flow (150 countries)
- **Year** of flow (from 1995)
- **Price range** of flow (High, Medium-High, Medium, Medium-Low, Low)

For each flow the following measures are available:

- **Monetary values in FOB prices** (Free On Board) of flow
- **Monetary values in CIF prices** (Cost Insurance Freight) of flow
- **Quantity in kg** of flow
- **Quantity in UMS** (supplementary unit measure) of flow (where available for the product)
- **Quantity at constant prices** of flow

In this document monetary values are expressed in FOB prices.

Data for 2020 is estimated, based on short-term records of ExportPlanning sample countries.

Forecasts

Forecasts contained in this report have been developed by **StudiaBo** from the **Ulisse Database** and from the *World Economic Outlook Database*, released by the International Monetary Fund. You can browse the data through the [Analytics Section of Exportplanning.com](https://www.exportplanning.com/analytics).

Forecasts are the output of an **integrated econometric model of demand and competitiveness** that starts from the expected macroeconomic trends and capacity of countries to compete in international markets. They provide a robust estimate of the scenario of imports by market and product ([see methodological note](#)).

The **Ulisse-Forecast Database** basic unit is the Annual Flow of World Trade for a given product code between two partner countries.

Its identifying elements are:

- **Product code** of flow
- **Origin country** of flow (150 countries)
- **Destination country** of flow (150 countries)
- **Year** of flow (from 2000)
- **Monetary values in FOB prices** (Free On Board) of flow
